## POLICY STATEMENT

The Senior Management Team (SMT) ACC Liverpool are committed to continual improvement in the efficiency in which energy is used, the prevention and avoidance of energy waste. This policy will form the framework for setting energy consumption and reduction targets that will be continually reviewed as targets are achieved and/or the need for change arises.

The Certification will apply to all aspects affecting energy use, which can be monitored and influenced by ACC Liverpool and the implementation of this standard will endeavour to reduce energy costs, GHG emissions and other environmental concerns.

The Energy Manager shall ensure availability of all the information and resources to achieve our objectives and targets and to plan and supervise the necessary projects and programs that maintain an energy management system compliant with ISO 50001, and any subsequent standard which supersedes it. This shall be achieved through monitoring energy performance and funding when justified through reasonable criteria.

The SMT of ACC Liverpool will commit to support the Energy Manager by considering the energy efficiency, when purchasing. Thus so, all senior managers who are involved in the procurement of electrical equipment, will treat energy efficiency as one of the key criteria in the purchase of products and services, and actively encourage energy efficient design.

Our prime objective is the reduction of energy consumption through setting relevant and achievable objectives and targets. These results along with any other objectives and targets shall be reviewed at planned intervals.

ACC Liverpool commits to carrying out such awareness raising, training and maintenances optimization programmes as may be required in pursuit of improved energy efficiency and reduced losses.

ACC Liverpool undertakes to comply not only with the relevant legislation relating to energy use, but to additional voluntary requirements which may be agreed.

ACC Liverpool ensures that this policy is understood, implemented and maintained at all levels and through the energy system management review ensures its continuing suitability. The setting of objectives and targets enables us to continually improve our energy efficiency.

This policy shall be reviewed and updated at defined intervals to ensure continuing suitability, adequacy and effectiveness.

***Reduction of our impact on the environment is the responsibility of all employees of the company.***
